

WEBINARS – LIVE WEBCASTS & INTERACTIVE PRESENTATIONS

“7 REASONS TO USE WEBINARS”

SPECIAL REPORT

www.jonrognerud.com

Webinars are a great way to inform, educate and present your information in a professional online environment – without the need to travel. You also have the ability to save the presentation (recorded), and let it be replayed by your prospect at a later date, and at their convenience.

Here are 7 reasons to consider webinars for your own use:

1. Webinars are an effective and economical way to communicate with hundreds of people at the same time, regardless of location, to tell them about your training, coaching, products or service.
2. Webinars make it easy to GRAB their attention and KEEP it as long as necessary to make a complicated sale (ex: coaching, real estate, insurance, financial services, info products).
3. Webinars are a great way to build a massive email list!
4. Webinars are a great way to get the Big Players in your niche to work with you!
5. Webinars are a great way to pre-qualify prospects ...so you can spend more time and resources on those who are actually interested in your service or product!
6. Webinars are the FAST and EASY way to create products whenever you want!
7. The BIGGEST Reason: Webinars are great ways to sell products or services.

In fact, next to face-to-face selling or selling in a seminar environment from the stage, they are the best way known today.

A recommended service to try is GotoWebinar.com and also Google Hangouts on Air (Free)

If you want information on how to set this up, emails to send and how to present, send a note to contact@jonrognerud.com
